Nationality: India

SUMMARY

I am a recently graduated BCA student with a keen interest in building new web applications, mostly centered around the user experience. I have set out to learn my way around the MERN stack (MongoDB, Express.js, React.js, and Node.js) that will enable me to build interesting, responsive full stack applications.

I have a good understanding of Java and Data Structures & Algorithms (DSA), which enable me to develop functionally correct, clean, and scalable code. I wish to learn and improve my front-end development as well as back-end development so that I can implement them in impactful applications.

After that, I will be doing my MCA so that I can further improve my technical knowledge, and keep developing as a software developer. If I am successful in offering any full stack solution to help solve real-world applications using technology, then I will feel that the ultimate objective has been met.

As I journey through life in academia and a career of technology, I reflect on ongoing improvement, creativity, and personal development. My sanctuary is listening to music, particularly while studying or working on a project, so I generally stay away from the news (which isn't always healthy for freedom of thought), helps me relax, and I believe transports the best of me.

EDUCATION

Smt. Parvathamma Shamanuru Shivashankarappa School Of Hi-tech Education - Undergraduate (Bachelor's Degree, Bachelor Of Computer Applications)
Davangere, Karnataka. August 2023 - August 2025

SKILLS

Java, Python

DSA

HTML / CSS

MERN

HOBBIES

Learning New Technologies, Web Development & UI Design, Solving Coding Challenges (e.g., LeetCode, HackerRank), Watching Tech Tutorials & Documentaries, Listening To Music
